

We have our video install guides on our website and on youtube.com also feel free to call or email us if you have any questions 1-855-457-5683 information@lovethedrive.com

Lexus SC430 2002 to 2010 Love The Drive Wind Deflector Install Guide

Start by putting your top down.
Then remove both of the covers behind the
back seat head rests.

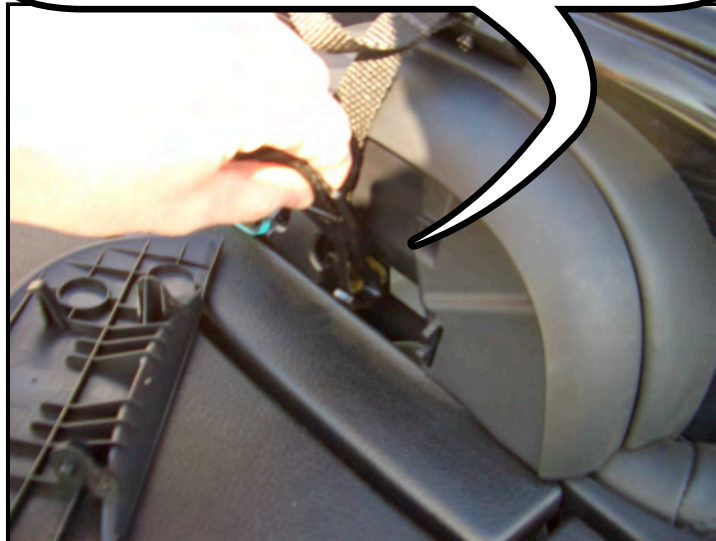

To remove the covers, pull the cover up and
back. Behind these covers is a child seat
anchoring system that will be used to attach
the wind deflector to your convertible.

Next, place the wind deflector so it sits on the rear head rests as shown below. Making sure that the black snap hook straps are behind the back seat head rests.

Now attach the black snap hooks to the hole provided from the child seat anchor system on each of the back seat head rests.

Once attached the black snap hooks will face towards the back of the car. Pull each snap hook up to lock it in place.

Next, replace the covers of the back seat head rests.

Now lower the wind deflector into the back seat area. The straps attached to the rear head rests will support the wind deflector. The female buckle will hang down into the back seat area.

Next you will need to attach the four black snap hooks to the child anchor system in the back seat area. The anchors are located between the top and bottom part of the seat. Look for a small circle child seat logo.

The black snap hooks are inserted with the snap hook facing down.

With your free hand push down on the bottom of the rear seat and slide the snap hook in and the down and pull back to attach it to the anchor system. Repeat this step for all four straps.

Next, attach the four black snap hook straps to the four buckles on the wind deflector.

The two straps in the middle of the back seat attach to the female buckle at the back of the wind deflector. The two outside straps attach to the buckles on each side of the wind deflector.
