

Clear Roll Hoop Windscreen

for

BMW Z4 E89

Kit Contents: Alcohol Cleaning Pads  
Clear Windscreen Panel  
Left / Right Mounting Brackets

Be Careful.....Installation may require leaning over the painted surfaces of the vehicle. Take precautions to protect the paint from belt buckles, buttons, snaps, etc.

Read This.....Proper installation requires mounting surfaces for bracket installation to be at least 70° f ... temperature that is.....!

Good Tip.....Read the instructions before you make any attempt at installation...do a trial fit of a bracket by lining up the bracket on roll hoop and find the correct position before removing the tape liner and installing the bracket.

Top of bracket has rounded profile at end. This end should be facing up when installed.

Figure A

Figure B

## Installing Mounting Brackets:

Clean the bracket mounting surfaces on both roll hoops with enclosed alcohol pads. Peel the tape liner (red) from back of one bracket (bracket will fit either side).

Place bracket in position as shown in Figure A. Starting at the bottom, line up center of bracket with the groove in the roll hoop (between grey plastic and black texture surfaces). Press bracket to roll hoop toward the top while maintaining alignment with the center of bracket to groove in roll hoop as shown in Figure B. Once the bracket is mounted to the roll hoop, apply firm pressure to the bracket for 10 - 15 seconds to secure tape. Good job...

Now repeat the same procedure for the 2<sup>nd</sup> bracket.

Place clear windscreen panel into bracket channels and press down until it locks into place on each side. Installation is complete... Let's go for a ride.....

# Care and Cleaning for your new Clear Roll Hoop Windscreen

This windscreen is designed to be a semi-permanent installation. It can be removed for occasional cleaning or storage. However, due to the design, it is not recommended that the panel be constantly removed and reinstalled. The mounting brackets are permanently installed and are not to be removed.

## Cleaning...?

To clean the acrylic panel we recommend Meguiar's Mirror Glaze Clear Plastic Detailer #18.

**DO NOT USE** Ammonia or Alcohol-based household glass cleaners on the clear acrylic panel.

Happy Trails & Enjoy the ride!
